

At Neverland, all our gluten free products are made with our proprietary flour blend, which contains: amaranth flour, brown rice flour, potato starch, teff flour, tapioca starch, millet flour and sorghum flour. We blend our flours in house and do our utmost to ensure that no cross contamination occurs; however, we are not a gluten free facility, and as such can offer no guarantees regarding gluten levels. We prefer the term "gluten omitted", and use it to indicate that there is no gluten in that recipe, and we have done our best to prevent cross contamination.

Any oats that are used in a gluten free recipe are processed in a wheat free facility, and are R5 ELISA tested to ensure purity. Our gluten free breads are not made in house and are gluten, dairy, soy and nut free, but do contain egg whites. Please let any staff member know of any food intolerance, and we will do our best to accommodate them.
